

Sponge Cushion, Inc., the leading manufacturer of rubber cushioning products, services the carpet and flooring industries. We have been committed to minimizing our impact on the environment - past, present and the future. We are always seeking more environmentally sound manufacturing processes for ensuring success through innovation and technology.

Our company has always prided itself on the quality of our products as well as our service. Not only do we focus on providing products of consistent quality, we are also dedicated to doing our part to ensure a cleaner environment.

All of our products are tested in accordance to the Carpet & Rug Institute's Good Indoor Air Quality program, referred to as Green Label. This voluntary program certifies the carpet cushion as meeting and exceeding the standards established by the industry for VOC emissions. All SCI cushion products proudly carry this certificate. Today we offer many green characteristics which contribute to a cleaner, safer environment. We are committed to doing our part in the green community and are proud to announce our membership to the United States Green Building Council.

Sponge Cushion, Inc., a true partner for life, not only for our excellent products, but because we care about the generations to come.
